

'Pro-Tech' what's important to you!!

Alarm Clock WiFi Spy Camera

This innocent looking digital alarm clock has within it cleverly disguised a covert spy camera which provides excellent remote monitoring of your home, office or holiday home through WiFi technology.

The Alarm Clock WiFi spy camera also comes complete with a built in DVR and a massive 32GB of memory which allows for recording of the video and sound. The massive memory storage allows for recording and playback of the live footage viewed. Viewing live footage is done via the smartphone App which also allows you to record what you're viewing direct on to your smart phone and also on to the built in memory of the spy camera.

The Alarm Clock WiFi spy camera is extremely is easy to use and set up, simply plug the alarm clock in to the mains for power then it will automatically configure to your internet connection so you only need to input your router password, done via the smart phone app, for an always active connection.

Once setup the spy camera can be deployed anywhere in your property, within your WiFi range, and can be remotely viewed from any Android or iPhone smart phone via the app.
