Bug Detector – Entry Level

This is a portable bug detector and is capable of detecting any device transmitting from 1MHz – 6GHz. Detecting methods include a bar graph, audible beeps and vibration making it useable in all environments. The Bug Detector is very easy to use and can be utilised in offices, homes and even vehicles.

The Bug Detector can help locate any monitoring device on your premises, from conventional audio bugs to transmitting trackers on your vehicle. The Bug Detector has very low power consumption so with decent batteries it can provide up to 5hrs continuous use.

This device is highly recommended for use by both professionals and newbie's.

Features:

- Easy to use
- Fully integrated speaker & earphone for output of the alert tone
- Built in vibrator for silent alerts
- Complete with presentation box & instructions
- Slim & Compact design

Specifications:
