

'Pro-Tech' what's important to you!!

Ghost Phone

This innocent looking mobile phone is actually a discreet room monitoring device. Disguised as non-working mobile phone this GSM room monitoring device allows you to monitor surrounding conversations from any where in the world. Simply insert a valid SIM card inside and then ring that SIM card number, from any phone, when you wish to listen. This device will not ring, light or vibrate it is not a mobile phone but disguised as one for easy deployment. Once left in the target area you will be able to listen into surrounding conversations at your convenience. This device is highly recommended for use by both professionals and newbie's.
