

'Pro-Tech' what's important to you!!

Mini Digital Audio/Video Recorder

The Mini DVR is perfect for recording from a camera without the need of a conventional bulky DVR. The Mini DVR can provide almost all the same features as a normal DVR but with the convenience of being ultra small and portable. This Mini DVR utilises MPEG4 compression that's near DVD quality for recording and also video playback offers up to 640x360 resolution at 30 FPS (Frames Per Second) or in other words, real-time speed. Further, it includes an 'A/V Out' so you can watch your live/playback on any regular TV or Monitor. Live display picture resolution and format is a JPEG 640 x 480.

Also included is the power supply that either powers the unit or recharges the built-in Li-ion battery. Battery life is approximately 2.5 - 3 hours. Further the unit contains an SD Card slot (up to 2GB is supported) for data storage. Recording times will vary +/- 10%, but you can expect approximately 2 hours recording on a 1GB, and 4 hours recording on a 2GB SD card. Other features include Motion Detection recording and Auto Cycle recording (automatically overwrites old data if desired). Other conveniences include a Belt Clip for easy carrying and a Remote Control for easy navigation via its OSD (On Screen Display).

Features:

- Easy to use
- Time & Date stamp on footage
- Records Audio & Video
- Complete with remote control
- Compatible with all video composite cameras
- High quality – 640 x 360 Resolution
