

***'Pro-Tech' what's important to you!!***

## **Voice Activated GSM Listening Device**

The Mini GSM VOX listening device, like any GSM bug, is an audio surveillance unit that can be dialled into from anywhere in the world for real time audio monitoring of up to 15 meters around the unit. The Ultra Mini boasts not only superb audio clarity through the sensitive microphone but can be set for voice activation and call you when it 'hears' sound.

The unit is powered by an internal rechargeable Li-ion battery offering up to 5 days on standby using the voice activation feature (up to 15 days without the voice activation feature) and 3 1/2 hours call in time. The voice activation feature can be easily activated or de-activated by simple text message commands from anywhere in the world.

The Mini GSM VOX listening device is a tri-band device so is fit for use across the UK, Europe, Asia and in most US States (Please check the GSM frequencies operating in your area).

### **Features:**
