## **Plug Adapter 15Hrs Voice Recorder**

This cleverly designed adapter is not only a normal fully functional two way plug adapter but also a covert high quality audio voice recorder. With the touch of a button this device can begin to capture conversations up to a 10 feet radius whilst in the target area, weather it be at home or in your office. Very easy to use this covert device simply operates on a single button and recordings are easily accessed via the discreet USB connection. This device can record for up to 40hrs continuously so it can be left in the target area for just under two days. Its ingenious design makes it very easy to leave plugged in or just lying around and its covert nature makes it very easy to deploy in target areas without creating any suspicion. This device is highly recommended for use by both professionals and newbie's.
