

***'Pro-Tech' what's important to you!!***

## **Covert Digital Audio USB Data Stick Recorder**

This cleverly designed USB data stick is not only a normal data stick but also a covert high quality audio voice recorder. With the touch of a button this device can begin to capture conversations up to a 10 feet radius whilst on your person or simply left on a desk.

Very easy to use this covert device simply operates on a single button and recordings are easily accessed via the USB connection. The compact & slim design of this device makes it very easy to carry with you and its covert nature makes it very easy to deploy in target areas without creating any suspicion.

This device is highly recommended for use by both professionals and newbie's.
